Re: Class 83 and 84 Guidance from GSA

I have recently learned that DRMS has placed a hold on all transfers and donations of lab equipment and clothing. This is in response to a recent GAO report and Congressional hearings. DRMS is validating that there are no NBC suits mixed in clothing lots and is trying to determine exactly what lab equipment is to be further controlled. At this time, we are still allocating any property reported to GSA, but DRMS is holding the documents and not releasing the property. All new receipts will be frozen in DoD screening and reported to GSA at some later time. That's it, as far as I know from DRMS.

Dave
