www.nasasp.org September 2026

NASASP President's Inkwell

Hello NASASP Family,

I have one question for everyone: Is it hot enough for you yet? Holy Smokes, here in Arkansas we have had several days of over 100° F, and it has been brutal to be outside for more than a few minutes. Our warehouse is not climate controlled so the temps almost matched the outside temp. Maybe a side project where I could advertise a part of it as a new age sauna for the office workers nearby and make some side money for the program?? I think I am ready for some fall weather to hurry up and get here! Speaking of hot times, we had a really great 79th Annual NASASP National Meeting and Educational Seminar in Washington D.C. back in July. We had 3 Donees give presentations to the group and all 3 did fantastic jobs; we got a chance to visit with our corporate sponsors, as well as, our federal parters and we even learned a few new things.

One other note about this year's meeting was the President's Banquet held at the Capital Hill Club and how good-looking all of our NASASP family was that night. Check out the pictures that are in this issue and see if you agree with what my grandpa used to say, "they cleaned up real nice and were wearing their ice cream clothes." If you don't know that old saying, you may not have been exposed to southern charm. Everyone looked so nice and it didn't kill any of the gentlemen to wear a tie for a few hours that night.

We were down in numbers somewhat this year as some familiar faces were not with us this year. Some were lucky and retired from the rat race, some couldn't be there due to family emergencies, illnesses and other obligations, and some couldn't travel this year. We did miss them and thank them for their contributions, regardless. But we did have some new faces with us this year and I hope we gave them a warm welcome and they get to join us next year as well. When you look at what we do and what we represent, we are a very small fraternity of experts in that there are only 56 programs that do what we do and we have one of the coolest jobs on the entire planet. So, when we get a chance to get together in the same room, it's a special occasion regardless of how many folks there are.

I hope you got a chance to view the Ernst & Young, LLC. presentation of the Economic Contribution of Federal Surplus Property Donation Program on August 11, 2026. This is probably one of the most important things NASASP has undertaken in the time I have been in the association. If you missed the presentation or would like a copy of it, you can email NASASP Secretary, Jessica Burns-McDonnell at secretary@nasasp.org and she will send you a copy. Also, I think it will be posted to the NASASP website soon.

I, and the other Officers, thank you for your support! Now let's get to work and keep the Federal Surplus Property Program moving forward and supporting our Donees.
Chris Reynolds
NASASP President
ARFSP Program Director

2026 NASASP Annual Meeting

Our 2026 meeting was held July 20-24 at The Darcy Hotel in Washington, DC. SASPs represented include: Alaska, Arkansas, District of Columbia, Georgia, Guam, Hawaii, Idaho, Maryland, Michigan, Nebraska, Nevada, New Mexico, North Carolina, Pennsylvania, South Dakota, Virginia, West Virginia, and Wisconsin.

The meeting began with the Presentation of Colors from the Army Color Guard from The 3rd U.S. Infantry Regiment (The Old Guard). Committee reports were given. Chris Reynolds, NASASP President, had "Dad jokes" throughout the meeting, as well as, trivia questions for everyone. The general consensus was that the laughs & chuckles were a good distraction between reports and presentations.

Presentations were given on GSA PPMS, PPMS Sales, GSA Fleet Management, GSA Office of Governmentwide Policy, NASA, GSA Office of Civil Rights, aircraft request requirements, and eligibility & compliance.

In addition, donee speakers attended to explain the importance of the donation program to their operations. These donee speakers included: Whitney Lindsay with Allied Response, LLC in Texas; Esther Enison with Nest Home Care, LLC in Maryland; and Mohammed Khan with Marhaba Daway Center of America in Maryland. It is always so rewarding to hear first hand from donees so NASASP thanks them for taking the time to make their presentations.

Our President's Banquet was held at the Capital Hill Club followed by a guided tour of the Capital. These were sponsored by John Chwat, NASASP's Director of Government Relations. It was a fantastic evening and everyone looked so nice! Thank you John for an unforgettable evening!

Awards were presented as follows:

President's Award to Tim Bolles (Michigan)
President's Award in Honor of Lee Ann Blythe (Missouri)
Extra Mile Award to Hattie King (Idaho)
Best Use of Donated Property to Thomsen Foundation (Texas)

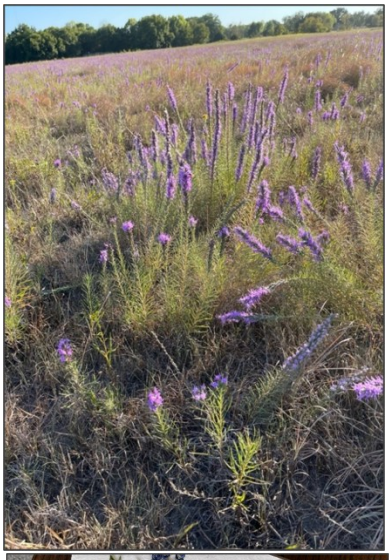
We want to give special thanks to our corporate sponsors for their participation in our meeting: Assetworks, GovDeals, Get Loaded Transportation, Public Group, SD Nexus & Web Data. Our meetings would not be the same without you! (Editor's note: I apologize for failing to get pictures of the corporate sponsors!)

Before adjournment, the decision was made to hold the 2027 meeting in Jefferson City, Missouri.

2026 Winner-Best Use of Donated Property

Thomsen Foundation (Texas)

The Thomsen Foundation, a 600 acre educational nature preserve nestled in Texas's Cross Timbers Region, has been a beacon of environmental stewardship and hands-on education since its founding in 1982. Dedicated to preserving native habitats and celebrating the beauty of wildflowers, the Thomsen Foundation provides immersive learning experiences for students of all ages while also serving as a distinguished dark-sky observation site for the Fort Worth Astronomical Society. A proud participant in the TX SASP Federal Surplus Property Program since 2006, the Thomsen Foundation stands out as one of the most innovative and resourceful donees in the program's history.



Over the past two decades, the foundation has transformed more than 1,100 federal surplus items by repurposing shipping containers into functional facilities, converting cargo trailers into observation blinds, and, most recently, even using surplus straps as materials for children's art and environmental education projects. Their ability to reimagine surplus property into meaningful educational tools is inspiring.

For example, Jessamy Hermes tells the TXSASP,

"The Thomsen Foundation found a creative way to put some surplus straps from the Texas Facilities Commission to good use! We have plant presses that we use with students on field trips, but the original straps weren't very user-friendly for small hands. We swapped them out for the fantastic straps we acquired from TFC, and they worked perfectly! Students were able to press lots of flowers, which they later used in our annual poster contest. Thank you, TFC, for another great find that helps us support hands-on learning with our students!"

Through its strategic and imaginative use of surplus resources, the Thomsen Foundation has saved over $724,000 compared to buying new, allowing them to further enrich its educational programming. This remarkable effort reflects not only fiscal responsibility but also a deep commitment to sustainability and innovation.

We are proud to nominate the Thomsen Foundation for NASASP's 2026 Best Use of Donated Property Award. Their relentless pursuit of maximizing the value of surplus property drives environmental education, fosters creativity, and inspires young minds to become stewards of the natural world. The Thomsen Foundation's use of donated surplus property showcases the potential of the surplus program when guided by vision, ingenuity, and purpose.

Donee Success Story

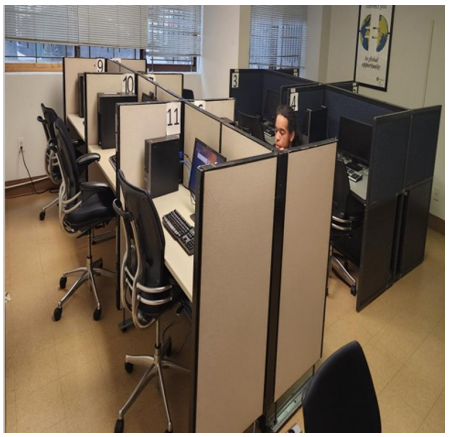
Community Tech (District of Columbia)

Community Tech, LLC is built on a simple but powerful mission: "Advancing Communities through Technology." The DCSASP program has been a cornerstone partner in helping us bring that mission to life—providing surplus equipment and materials that directly expand what we can offer to residents across Washington, DC.

Access to reliable technology builds confidence, expands opportunity, and strengthens the entire community. We serve middle & high school students, adult learners and community members seeking career-readiness skills. We offer digital literacy, workforce training, technology certification prep, and industry-recognized credentialing.

Desktop computers and monitors received through the DCSASP directly support our authorized certification testing center—one of the most important assets Community Tech offers to the DC community. Professional testing stations allow residents to pursue industry-recognized credentials without traveling far or facing logistical barriers.

Reliable connectivity is the backbone of everything Community Tech delivers. Bulk cable, wiring, and related networking materials received through the DCSASP have made it possible to establish dependable network connections throughout our entire facility.



Multifunction printers received through the DCSASP are workhorses of our daily operations. From first-day handouts to certificates of completion, these printers help Community Tech produce professional materials efficiently and at significantly reduced cost—allowing us to redirect savings back into programming.

The DCSASP program enables Community Tech to operate at a level that would otherwise be out of reach for an organization of our size. Every piece of equipment received translates directly into expanded capacity, improved quality, and greater reach within our community.

Donee Success Story

Adams County Emergency Management, Hastings (Nebraska)

I am writing to express my appreciation for the availability to purchase equipment from the Nebraska Federal Surplus agency. Adams County, like most other counties, face tight budgets and reduced grant capabilities. Having the opportunity to purchase equipment, make the equipment deployable at a fraction of the cost of new is a great benefit! Over the years since taking this position, I have utilized the Nebraska Federal Surplus for several purchases.

From the vehicle I use daily to a light trailer that I rehabbed into a fully functioning location monitoring unit. Our light trailer is a fully functioning area monitoring with remote live feed cameras, LED Flood lights, PA system, and Warning Lights, LED SpotLight, GPS Tracking, Mobile WIFI hotspot. To my most recent purchase, the one I am most proud of, our SkyWatch unit!

The equipment didn't exactly start out this way, but that is the great part. For a little investment, a little work, sometimes a lot of work, the end result is something the county could never afford new.

A little cleaning, some paint and some minor repairs have an outcome of savings of over $300,000 if we were to purchase this equipment new.

Thank you Nebraska Federal Surplus from Adams County Emergency Management!!

Donee Success Story

HLOR, Inc. (Nevada)

"I am incredibly grateful for the opportunity to participate in this program. I operate a small ranch and have needed equipment for quite some time. I was surprised and excited to come across a small older baler on the site, and I received the call that it had been awarded to me while I was returning from selling cattle at auction. I couldn't believe anyone else hadn't requested it.

Retrieving the baler was a challenge, especially with the government shutdown and winter weather approaching. I had to travel over multiple mountain ranges in November, have the wheel bearings packed before beginning the trip, and tow it slowly for hundreds of miles with limited daylight. Along the way, I slept in my van in temperatures as low as 18 degrees and waited on the side of the road for ice to melt so I could continue safely. Special thanks to DOT for advising me about rough conditions along the route.

Once I got it home, the real work began. The baler had been stored outside and unused for a long time, and every grease fitting was frozen. With a lot of effort and determination, I was able to bring it back into working condition. Mission accomplished.

What would have only been a dream for many years because of the cost, it is now a reality. This is truly an outstanding program for small businesses operating on limited budgets, especially for those willing to put in hard work, use mechanical skills, and creatively manage transportation and repair costs. Don't let old paint fool you—hard work and care can go a long way. This old baler and I still have many good years ahead of us.

Thank you again for giving my small business the opportunity to participate in such a valuable program. The girls thank you too. It has truly been a win-win."

Donee Success Story

CFJR Safe Travels Corporation (Georgia)

As a service-disabled U.S. Army veteran, Clyde Flemming, Jr. witnessed firsthand how transportation can be a significant barrier for veterans and seniors in accessing the care they need. Determined to address this challenge in the Metro-Atlanta area, he founded CFJR Safe Travels Corporation, a company dedicated to providing ADA compliant transportation for veterans and seniors. To continue meeting the growing demand for reliable, accessible transportation, CFJR Safe Travels turned to the DOAS Surplus Property Program for support in expanding its vehicle fleet.

In April 2025, while attending a Boots to Business class hosted by the Georgia Veterans Business Outreach Center (GA VBOC), Flemming learned about the Surplus Property Program and its benefits for small businesses. Recognizing an opportunity, he applied to the program soon after.

Within their first month of enrollment, CFJR Safe Travels applied for two additional ADA-compliant vehicles. With guidance from Surplus Property Director Tashika Wells, Flemming successfully navigated the application process and overcame challenges related to vehicle acquisition.

As a result, CFJR Safe Travels obtained two ADA-compliant buses from the Michigan VA through the Federal Surplus Program. Each bus is equipped with wheelchair lifts and designated wheelchair seating, ensuring ease of access for all passengers.

Flemming described the impact of the new vehicles as transformational for his business: “These vehicles allowed us to expand our fleet and launch scalable ADA group transport services," Flemming said. “We've transported seniors to church and community events, supported a 3-day event with shuttles to off-site parties, a golf tournament, and cookouts, and delivered large-scale mobility services without having to lease vehicles. Most notably, the added capacity and accessibility helped us partner with the Atlanta Airport District’s destination services team as an approved transportation supplier. These vehicles have been instrumental in reaching underserved populations and driving the success of our Accessible ATL Transfer Program. I truly owe the future success of my business with these vehicles to Ms. Wells. Her impact is already being felt in the lives of the people we serve, and I’m incredibly grateful.”

Thanks to the Surplus Property Program, CFJR Safe Travels continues to grow its mission of serving veterans and seniors, ensuring they have access to safe and reliable transportation.

Wake the 8 DC (District of Columbia)

Wake the 8 DC is a nonprofit focused on reducing health disparities by providing accessible fitness, wellness, nutrition, and health education programs to underserved communities in Washington, DC.

The District of Columbia Surplus Property Program has been a vital partner in supporting our mission. Through the program, we have received a 1998 Dodge Caravan, 2001 Ford F-250, printer, elliptical machine, exercise bike, a projector, and 75" TV monitor and platform, all of which have strengthened our ability to serve the community.

These resources have improved transportation for events, enhanced fitness programming, and supported education workshops and cooking demonstrations. As a result, we have been able to expand our reach and deliver more impactful services.

We are grateful to the Office of Contracting & Procurement Surplus Property Division for helping us grow our capacity and better serve DC residents. Thank you for your continued support.

Edward Hardy
Community Health Advocate

The Buddy Project, Frederick (Maryland)

The Buddy Project refurbishes computers for people with disabilities and/or while using disadvantaged people to teach them skills to help refurbish these computers.

MDSASP and the Personal Property Donation Program has been a lifeline for The Buddy Project. We not only help individuals, but we also help other non profits who are low on resources get computers. I highly recommend using this program if you are in the need of surplus government property as they do not JUST offer computers, they offer just about anything you can think of.

In friendship,
Eric D. Zimmerman
Founder and Technical Director
The Buddy Project, Inc.

VetStrong (Texas)

VetStrong, a San Antonio based nonprofit organization, received this box van from the TXSASP in 2021. The box van is used to deliver gently used household furniture to homeless Veterans that were recently rehoused. Chief Executive Officer James Pobanz says,

"Since we acquired the box van, we have been able to provide furniture to over 200 Veterans and their families. We would not have been able to do so without the vehicle. We have added our logo, installed a metal roof, and gotten new tires. This has been a game changer for San Antonio, as it brings happiness to those in need and gets people off the floor when they sleep, thanks to the beds [delivered by this truck]."

The service charge paid for this box van was $3,500 compared to an original cost of $25,200 when purchased brand new.

That is a savings of $21,700!

Donee Success Story

Eighty 80 Ranch, Crescent Valley (Nevada)

In 2024, I retired from a US government agency and moved west to a piece of property in Eureka, NV. Learning of the program for acquiring surplus government property for use in a veteran owned business intrigued me. It took over a year of cutting through the government red tape before being provided viewing access to the surplus.

WOW! The amount of surplus and the breadth of categories was overwhelming at first. After the initial feeling washed away, the search began for something which would aid our business, Eighty 80 Ranch/Farm.

We attempted to secure a tractor in another state, but did not obtain it. The second attempt was successful. A camper in near perfect condition. Some people have asked how a camper supports our business. The answer is it provides a space as an office for the business.

The staff at the NV surplus office are a pleasure to work with. The process was fairly smooth. We picked up the camper and received the paperwork. The state office made the acquisition for our property so smooth.

Our participation in the surplus program will continue as we identify property which will benefit our business.

Thank you.
Dan Whittacre
Owner, Eighty 80 Ranch
Crescent Valley, Nevada

Donee Success Story

Calvin Woodland Sr. Foundation (District of Columbia)

July 17, 2026

Dear Sir/Madam:

We are a non-profit 501(c)(3) organization dedicated to developing and delivering programs and services that eliminate barriers affecting low-income residents in Washington, D.C., and the surrounding area. We are committed to providing meaningful activities and support system to youth and families to foster a more equitable and supportive community for all.

I have extensive experience working with the **DC Surplus Property Division**, particularly in navigating its processes for acquiring, repurposing, and managing government-owned property for community-serving programs. My work has included coordinating with division staff to identify available properties, assessing suitability for youth-focused and workforce-readiness initiatives, and ensuring compliance with District guidelines for occupancy, maintenance, and program operations.

I would like to express how much the Office of Contracting & Procurement, Surplus Property Program as done for our organization and community. We have been a part of this program for over 10 years and our youth have truly benefited in so many ways.

We have been able to procure a 1997 fifteen (15)-passenger van, office furniture, computers, projectors, and recently gym equipment Without this program, we would not be able to service 100's of youth throughout the Washington, DC area.

In closing, I would like to thank my contact person Ms. L. Gross for all she does she continues to go above and beyond always assisting in any way she can.

Sincerely,
Mary Blount, Exec. Director
Calvin Woodland Sr. Foundation

Donee Success Story

Chattahoochee Technical College (Georgia)

For over two decades, Chattahoochee Technical College has been an active and proud participant in the DOAS Surplus Property Program. The college first learned about the program through a valuable connection with the Museum of Flight at Paulding County Airport, and since then, it has become a long-term beneficiary of both state and federal surplus property.

Most recently, the Aviation Maintenance program at Chattahoochee Technical College received a remarkable addition to its training fleet: a TH-57B Bell Ranger 206 SN 161696 Helicopter. This addition is more than just a piece of equipment; it represents a major enhancement to the college's curriculum and student experience.

Thanks to the DOAS Surplus Property Program, students can now gain real-world experience not only with fixed-wing aircraft but also with rotary-wing systems. The helicopter allows students to observe and participate in the unique operational and maintenance aspects of rotorcraft. They are taught how to start and run a helicopter, enabling them to grasp the critical differences between fixed-wing and rotary-wing aircraft, knowledge that is essential for a well-rounded aviation maintenance education.

This hands-on experience provides a competitive edge for students entering the workforce and is a direct result of the resources made available through the DOAS Surplus Property Program.

Chattahoochee Technical College is grateful for the ongoing partnership and encourages other eligible institutions and organizations to explore the vast opportunities the Surplus Property Program offers. For Chattahoochee Tech, it's not just about acquiring surplus— it's about investing in the future of skilled aviation professionals.

NASASP Government Relations Report

A New 120th Congress Coming after November 3, 2026

by John Chwat, NASASP's Director of Government Relations

2027, a little more than 100 Days from now, will be a momentous and critical year for NASASP and all 56 SASPs. Next year marks the 80th anniversary of NASASP's founding—a true milestone for any association, as very few hold such a long history. State re-utilization via donation to states started, however, in 1944, 3 years earlier, with the Congressional passage of the Surplus Property Act, signed into law by President Franklin Roosevelt. The Federal Property and Administrative Services Act became law in 1949 creating the current donation program and creating the General Services Administration (GSA).

Aside from the 80th Anniversary, which epitomizes a successful partnership between the states and the federal government, 2027 will also mark the start of the 120th Congress which will last for calendar years 2027-2028. The U.S. House and U.S. Senate will begin their 1st Session on January 4th. Why is this important? A new Congress brings with it new majorities in charge of the legislative process; new committee and subcommittee chairs, and new professional staff that control and determine legislative consideration, amendments and passage of bills into laws impacting the state donation processes, policies and regulation. There are about 10,000 or more staff on Capitol Hill serving in the House and Senate, and many of these office and committee professionals will have new positions, ideas and policies to consider.

As of September 2026, there are 71 members of the U.S. Congress (11 in the Senate and 60 in the House) that are not seeking re-election this November. It is one of the largest number of retirements in decades; past retirements have been in the 40-50 number range. What does this signal for NASASP? Many key committees that control policy and funding decisions for the next 2 years will have new leadership starting in 2027. Many new members in committees with jurisdiction over GSA, SBA, DLA and impacting property rules will also have new staff and new outlooks.

2027 will also usher in major impacts on the donation program policies. At the last NASASP Annual meeting, a major milestone study was presented by one of the Big 4 U.S./World financial firms, Ernst & Young LLC (EY). This study reviewed the positive benefits the state donation program brings to recipients who participate with states in reutilizing federal surplus property. The study also indicated that increasing the program, and its access to more personal property, will result in job creation and economic benefits for localities/states as well as the federal government. EY has enhanced the NASASP educational outreach to elected officials and groups representing major state officials on state donation. We will hear more of the EY study as 2027 unfolds.

Some key issues coming up before the end of 2026:

- A General Accountability Office (GAO) Report on the State Donation Program, requested by Sen. Peters (D-MI) and Sen. Lankford (R-OK). This report will be out by the end of September and will interest NASASP and State Directors going forward. NASASP had an opportunity to provide perspectives and answers questions about the donation program.
- Fiscal Year 2027 funding and policy initiatives in the agencies of interest to NASASP will be decided prior to the end of 2026. These policies could result in new regulations impacting the donation program.

2027 and the following year will be quite important in the future of NASASP and its state agencies, including the Donees of personal property. Will there be more personal property available to the Donees, from veterans who own small businesses to public agencies to educational and nonprofit entities? NASASP is ready for the coming year. Are you?

John Chwat can be reached at johnchwat@mckeongrp.com, cell (703) 963-2917

HELP US STRETCH YOUR BUDGET DOLLARS

Become a NASASP Associate Member!

The Federal Surplus Property Program needs your help and your voice. Read on to see how your organization can help.

Associate Members of NASASP are key players on the Federal Surplus Personal Property Donation Program team. Associate Members are typically people or organizations who receive surplus property (and thereby save money for the citizens they support) and have a keen interest in the Program. Municipalities, schools, and certain non-profit organizations receive millions of dollars' worth of heavy equipment, computers, office furniture and equipment, vehicles and much more through the Federal Surplus Property Program each year. Help us ensure the growth of this valuable program through your support of NASASP. Your $39.00 membership fee supports the efforts of NASASP to increase the quality and quantity of surplus property available to you, and to open the program to other organizations that were not previously eligible to receive surplus property. For your $39.00 annual membership fee, you receive:

- Certificate of membership denoting membership.
- Updates about changes to the program.
- Invitation to attend, as a nonvoting guest, the annual meeting of NASASP.
- The satisfaction of knowing that you are making a difference by joining.

NOTE: *Membership in NASASP does not ensure your organization is eligible as a federal surplus donee. Only your State's SASP can determine eligibility.*

Associate Membership Application

Membership is for one year from the month we receive your dues.
